

# THE Y-DNA PROJECT

July 2018

Report from Elizabeth O'Donoghue/Ross, the Society's Group Administrator

I have just completed a long overdue update of the Interpretations page of the Society website, see <https://www.odonoghue.co.uk/projects/project-1/interpretations> . There is some new material and a lot of updated material, and I hope you will all take a look and browse through what is of interest to you. Do let me know if there is anything you wish was included or if you see any errors.

There is also a new privacy statement added to the Family Tree website for reasons explained in the statement - <https://www.familytreedna.com/groups/o-donoghue/about/results>. I just looked and see that the system has been creative in varying the font beyond what it was supposed to be, and when I have enough energy to tackle that, I'll get it fixed.

We are delighted to continue to see new members join us and get new results of various kinds, including more and always welcome Big Y-500s. I will review the details more thoroughly in my next report. I've been holding up the publication of the Quarterly Journal while I've been completing my much needed revisions and update to the Interpretations page, so I want to finish this report so Rod can publish the July 2018 Journal before it's August!

I'm still looking for some assistance in managing the DNA project. Perhaps some of the folks who have made inquiries will decide to toss in their hat and give it a go. I'm always hopeful

As Rod always says...

Cheers!
